The Scheme of a Local Bank for this Colony with Branches at the most important places in China, has been in contemplation for a very long period.

The local and foreign trade in Hongkong and at the open ports in Clina and Japan has increased so rapidly within the last few years that additional Banking facilities are felt to be required.
The Banks new in China being only branches

The Bank will commence operations simultane ously in Hongkong and Shanghai and as the importance of its business at the latter place must be very great, it is intended to establish a local y interested in the China Trade.

This deficiency the Hongkong and Shanghai Banking Company will supply, and will in fact assume the same position with relation to this Colony as the Presidency Banks in India, or the Banks of Australia in their respective localities. The Establishment of a Mint in Hongkong, providing an adequate supply of proper currency, will render a local Banking medium essential to carry out its operations, and the almost certain disappearance of the existing Compradoric system (so far as money is concerned) will also ensure Banks becoming in course of time the ciclusive medium for the transaction of the monetary operations connected with trade. For the anticipated success of this enterprise there are therefore ample grounds; and the great prosperity which has attended the working of other local associations in China clearly shows that the largest profits are obtained by those Public Companies which possess an interested local body of Proprietors or Shareholders whose
